

Exporting BLAST Results to Alignment

To export BLAST results as alignment select the results in the *Annotations Editor* and call the *Export->Export BLAST result to alignment* context menu item. The following dialog will appear:

The dialog box is titled "Export BLAST Result to Multiple Alignment" and contains the following fields and options:

- Export to file:** A text input field with a browse button ("...") to its right.
- File format to use:** A dropdown menu currently showing "CLUSTALW".
- Qualifier to use as name:** A dropdown menu currently showing "accession".
- Add reference to alignment**
- Add document to the project**

At the bottom of the dialog are three buttons: "Help", "Cancel", and "Export".

The following parameters are available:

Export to file - name of the new file.

File format to use - format of the new file. The following formats are available: CLUSTALW, FASTA, MSF, MEGA, NEXUS, PHYLIP Interleaved, PHYLIP Sequential, Stockholm.

Qualifier to use as name - name of the qualifier. The following qualifiers are available: accession, def, id.

Add reference to alignment - adds a reference to alignment.

Add document to the project - adds the new document to the project.

Select the options and click on the *Export* button.
