

# Changing Labels Formatting

To change formatting of a tree labels select the *Labels Formatting* toolbar button or the *Tree settings Options Panel* tab:

The image shows a 'Labels Formatting' options panel. It contains four rows of controls: 'Color' with a grey color swatch; 'Font' with a dropdown menu showing 'Helvetica'; 'Size' with a text input field containing '12' and a vertical spinner; and 'Attributes' with three buttons labeled 'B', 'I', and 'U'.

Here you can select color, font, size and attributes (bold, italic, etc.) of the labels.

Note that when *a clade has been selected* the labels formatting settings are applied to the clade only.
