

# db\_xref Qualifier

Some files in Genbank format contain the *db\_xref* qualifier. A value of this qualifier is a reference to a database.

NC_004718 features [sars.gb]	
3'UTR (0, 1)	
5'UTR (0, 1)	
CDS (0, 14)	
CDS	join(265..13398,13398..21485)
codon_start	1
db_xref	<a href="#">GI:30124074</a>
db_xref	<a href="#">GeneID:1489680</a>
gene	orf1ab
locus_tag	sars1

When you click on the value a web page is opened or a file is loaded specified in the reference. The loaded file is added to the current *project*.
