

Moving Subalignment

To move subalignment there are different ways:

1. Select a subalignment and drag and drop it. The subalignment will be moved.
2. With a help of the *Space* the subalignment will be moved to the right by size of the selection. With a help of the *Backspace* the subalignment will be returned to the first state.
3. With a help of the *Ctrl+Space* the subalignment will be moved to the right by one column. With a help of the *Ctrl + Backspace* the subalignment will be returned to the first state.
