

# Body Query Designer Element

The body begins with the **query** keyword followed by the title of the schema and curly braces:

```
query schema_title {  
  
    # Description of algorithm and constraint elements  
  
    # Metainformation  
  
}
```

Within the body you describe the required *algorithm* and *constraint* elements. The metainformation block can also be presented automatically added by the *Query Designer*.
