

# Primer Library

The primer library is a storage for keeping user primers. The added primers are stored between UGENE sessions.

Go to the *Tools->Primer->Primer library* context menu to configure the primer library. The following window will appear:

Click the *New primer* button to add a new primer. The following dialog will appear:

Input the primer sequence and primer name and click the *OK* button.

Select the primer in the table (you can use Ctrl and Shift) and click *Remove primer(s)* button to remove primer(s).

Select the primer and click the *Edit primer* button to edit primer.
