

Adding Element

There are several ways to add an *element* to the *Scene*.

The easiest way is to drag the required element from the *Palette* to the *Scene*. Or you can just click on the element on the *Palette* and then click somewhere on the *Scene*.

Also you can select an element in the *Add item* submenu of the *Actions* main menu or of the *Scene* context menu, for example:

When the required element is selected click somewhere on the *Scene* to insert it.
