

# Main Menu Overview

Menu	Description
<b>File</b>	A set of project level operations. <b>Example:</b> create, open, etc. a project; open a document; access remote database to download a file.
<b>Actions</b>	Various actions associated with the active window. <b>Example:</b> export, remove, edit, analyze a sequence using different plugins (for the <i>Sequence View</i> ); edit, align, change the consensus mode (for the <i>Alignment Editor</i> ).
<b>Settings</b>	Application, plugins and tools settings.
<b>Tools</b>	Various tools, independent of an active window. This menu is extended by different plugins. <b>Example:</b> HMMER2 / HMMER3 tools, SITECON, Workflow Designer.
<b>Window</b>	A list of active windows and basic manipulations with the windows. <b>Example:</b> close all windows, tile windows, select next window.
<b>Help</b>	Application help and check for updates.

The menus can be dynamically populated with new actions added by plugins. Check the [Plugins](#) documentation to learn how each plugin affects global and context menus.
