

Metainformation

The metainformation is added when you create / edit the schema with the *Query Designer*. It is not required for running the schema and is skipped when the schema is created manually, for example:

```
#Open Reading Frame surrounded by repeat units

query ORF-Repeats {

  Repeat {
    type: repeats;
    min-length: 10;
  }

  ORF { type: orf; }

  Repeat.left--ORF.unit {
    type: distance;
    distance_type:
    end-to-start;
    min: 0;
    max: 5000;
  }
  ORF.unit--Repeat.right {
    type: distance;
    distance_type: end-to-start;
    min: 0;
    max: 5000;
  }
}
```
