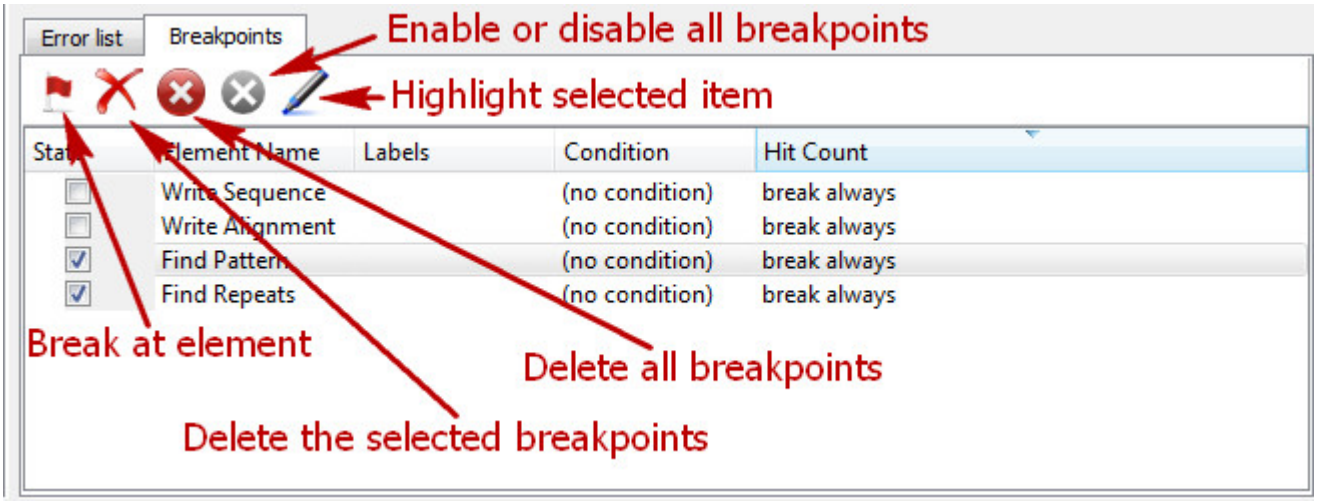
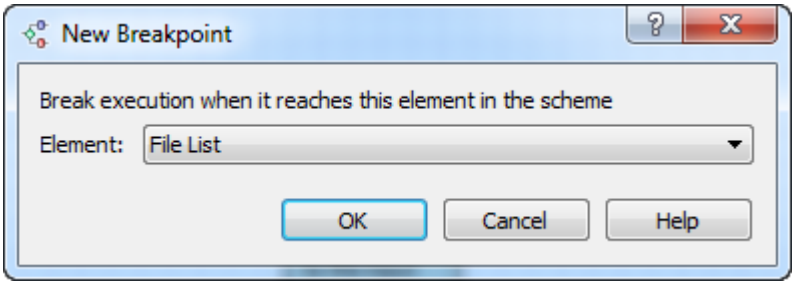
# Creating Breakpoints

You can create a pause element in a workflow with a help of the *Toggle breakpoint* button or by the *Ctrl+B* shortcut. To do it select the element and press this button. If you press the *Show or hide breackpoint manager* the breakpoint manager appears:



*Break at element* - creates new breakpoint. If you press on this button the following dialog will appear. Choose the breakpoint element and click *OK* button.



*Delete the selected breakpoints* - this button deletes the selected breakpoint.

*Delete all breakpoints* - this button deletes all breakpoints.

*Enable or disable all breakpoints* - this button check or uncheck all breakpoints. Check on the breakpoint means that the breakpoint enable and will be used.

*Highlight selected item* - this button highlights the breakpoint element.
