Selecting Sequence

You can use different items from the *Select* submenu of the context menu to select a sequence.

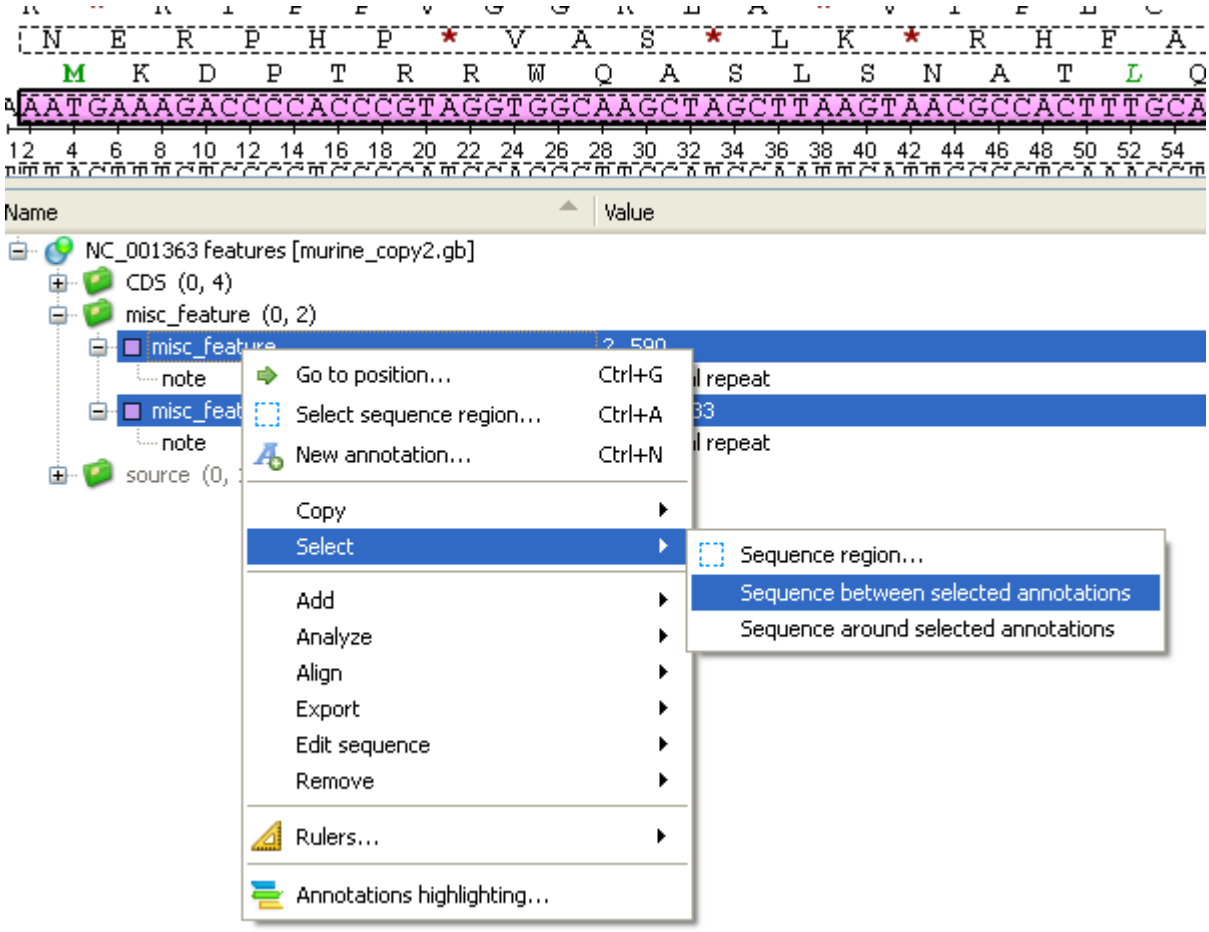

Selecting the *Sequence region* context menu item opens the *Select range* dialog:

Here you can specify the sequence range you would like to select.

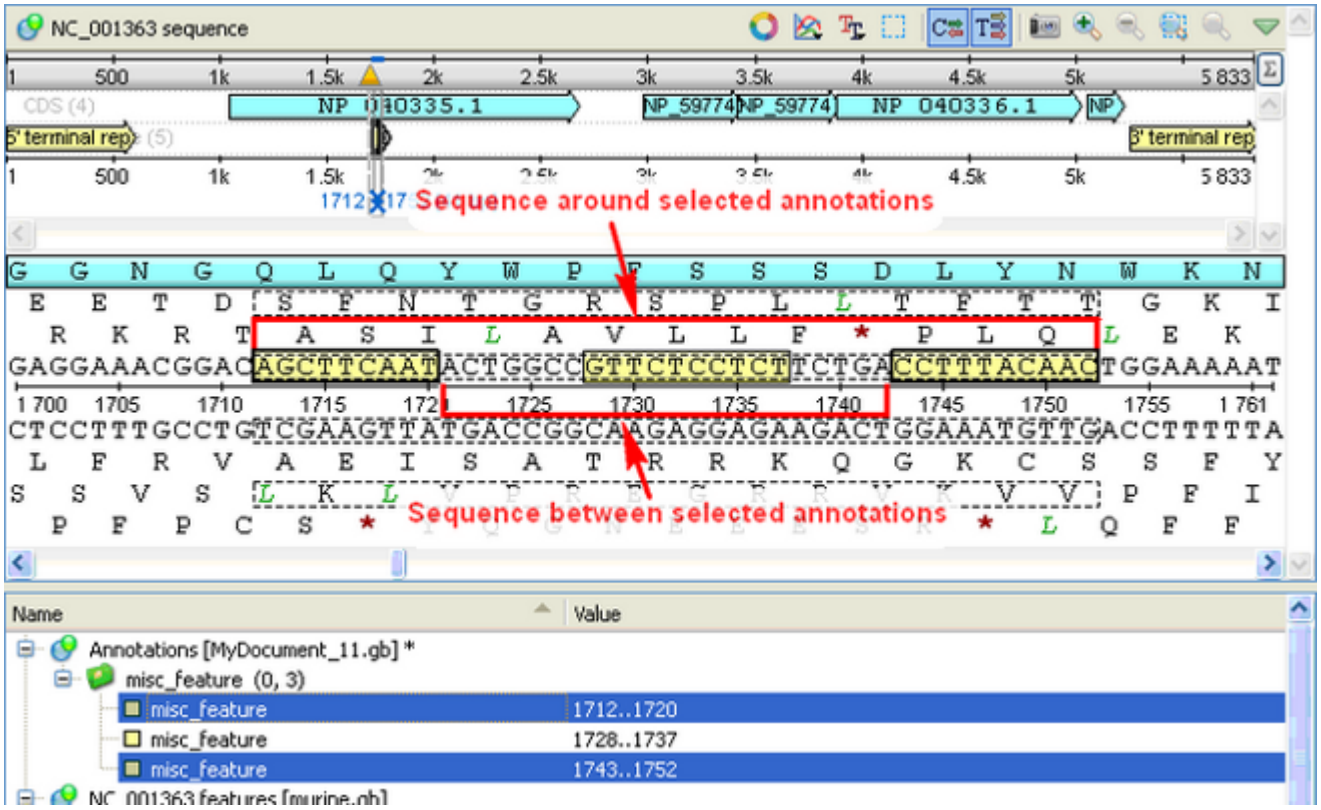

You can open the same dialog using the *Select sequence region* button on a sequence toolbar or using the Ctrl-A key sequence.

To use the *Sequence between selected annotations* item, select two annotations in the *Annotations editor* (holding the Ctrl key at the same time):

And select the *Select Sequence between selected annotations* item in the context menu.

The *Sequence around selected annotations* item selects the selected annotations and the sequences between these annotations.

Another way to select a sequence around annotations is to hold Shift and Ctrl keys while clicking on the annotations either in the *Sequence details view* or in the *Sequence zoom view*.
