

Circular View Settings

To configure circular view settings go to the *Circular View Settings* tab in the *Options Panel*.

Activate the circular view for a sequence and the following settings will appear:

The image shows a 'Circular View Settings' dialog box. It has a title bar with the text 'Circular View Settings'. The dialog is divided into three main sections: 'Title', 'Ruler', and 'Annotations'. The 'Title' section has checkboxes for 'Show title' and 'Show length', both of which are checked. Below these are fields for 'Font' (set to 'MS Shell Dlg 2'), 'Size' (set to '10'), and 'Attribute' (with a 'B' button). The 'Ruler' section has checkboxes for 'Show ruler line' and 'Show coordinates', both checked. Below these are fields for 'Label font size' (set to '10') and 'Font size' (set to '7'). The 'Annotations' section has a 'Label position' dropdown menu set to 'Inside/Outside' and a 'Font size' field set to '7'. On the right side of the dialog, there is a vertical toolbar with icons for 'ACG', a sequence logo, a bar chart, a color wheel, and a sequence logo.

In the title section you can show or hide title and length, change font, size and attribute.

In the ruler section you can show or hide ruler line and coordinates and change the label font size.

In the annotation section you can select the label position and change the label size.

The following label positions are available:

- inside - all labels are inside of the annotations
- outside - all labels are outside of the annotations
- inside/outside - if the label can fit the annotation and it is not auto-annotation, it's located inside. Otherwise outside.
- none - no labels at all
