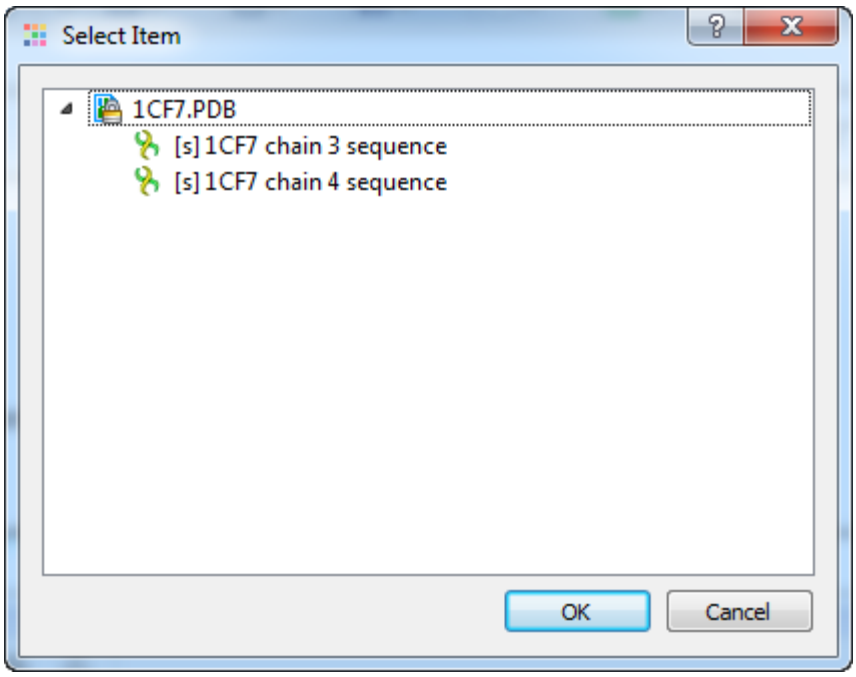
Adding New Sequences

You can add new sequences to an alignment using the *Add* submenu in the *Actions* main menu or the context menu.

There are two ways to add a new sequence to the current alignment:

- From a file in the compatible format (FASTA, GenBank etc.). The list of the supported data formats can be found *here*.
- From the current project.

If you activate this item, the following dialog will appear:



You will see the *Project View* tree filtered to show only appropriate sequences. Select the items to add and press the *Ok* button.
