

The "comment" Annotation

General information about a file in GenBank or Vector NTI Sequence format, stored in the COMMENT sections of the file, is shown in UGENE in a special *comment* annotation in the *Annotations Editor*.

The information, for example, may include the name of the file author, creation date and last modification date for the file, and so on:

2xCyPET-3xFLAG-6 features [2xCyPet-3xFLAG-...
