## **Exporting Tree Image**

A tree image can be exported to a raster format (.png, .jpg, .bmp, etc.) or to a vector format (.svg).

Select either the Export Tree Image toolbar button or the Actions Export Tree Image item in the main menu.

In the submenu appeared select the Screen Capture item to save the tree image to a raster format. The standard Save As dialog will appear where you can select the file name and format.

To export a tree image to a vector format select the As SVG item in the Export Tree Image submenu.
