

Inserting Character and Gap

To insert column of symbol or gap in the *Chromatogram Editor* select the nucleotide and press *Shift+I* or *Edit→Insert character/gap* context menu for switching the edit mode on.

While the selection is blinking, press a keyboard character that you want to insert.

After that the edit mode is switched off. For insert another symbol press *Shift+I* again.

You always can cancel the changes pressing *Ctrl+Z*.
