

Show on Translation

This option is available for nucleotide sequences only. It specifies to show the annotation on the corresponding amino sequence instead of the original nucleotide sequence in the *Sequence Detailed View*, for example:

D S P K L K
 2 I H Q S * N
 R F T K V E
 AGATTACCAAAGTTGAAA
 8 10 12 14 16 18 20 22 24
 CTAAAGTGGTTTCAACTTT
 I * W L Q F
 S E G F N F

You can enable/disable this option by checking/unchecking the *Show on translation* checkbox.
