

# Sequence View Extensions

The functionality of the *Sequence View* can be significantly increased with *Sequence View Extensions*. Below is the demonstration its functionality.

The [Circular Viewer](#) shows the circular view of a sequence:

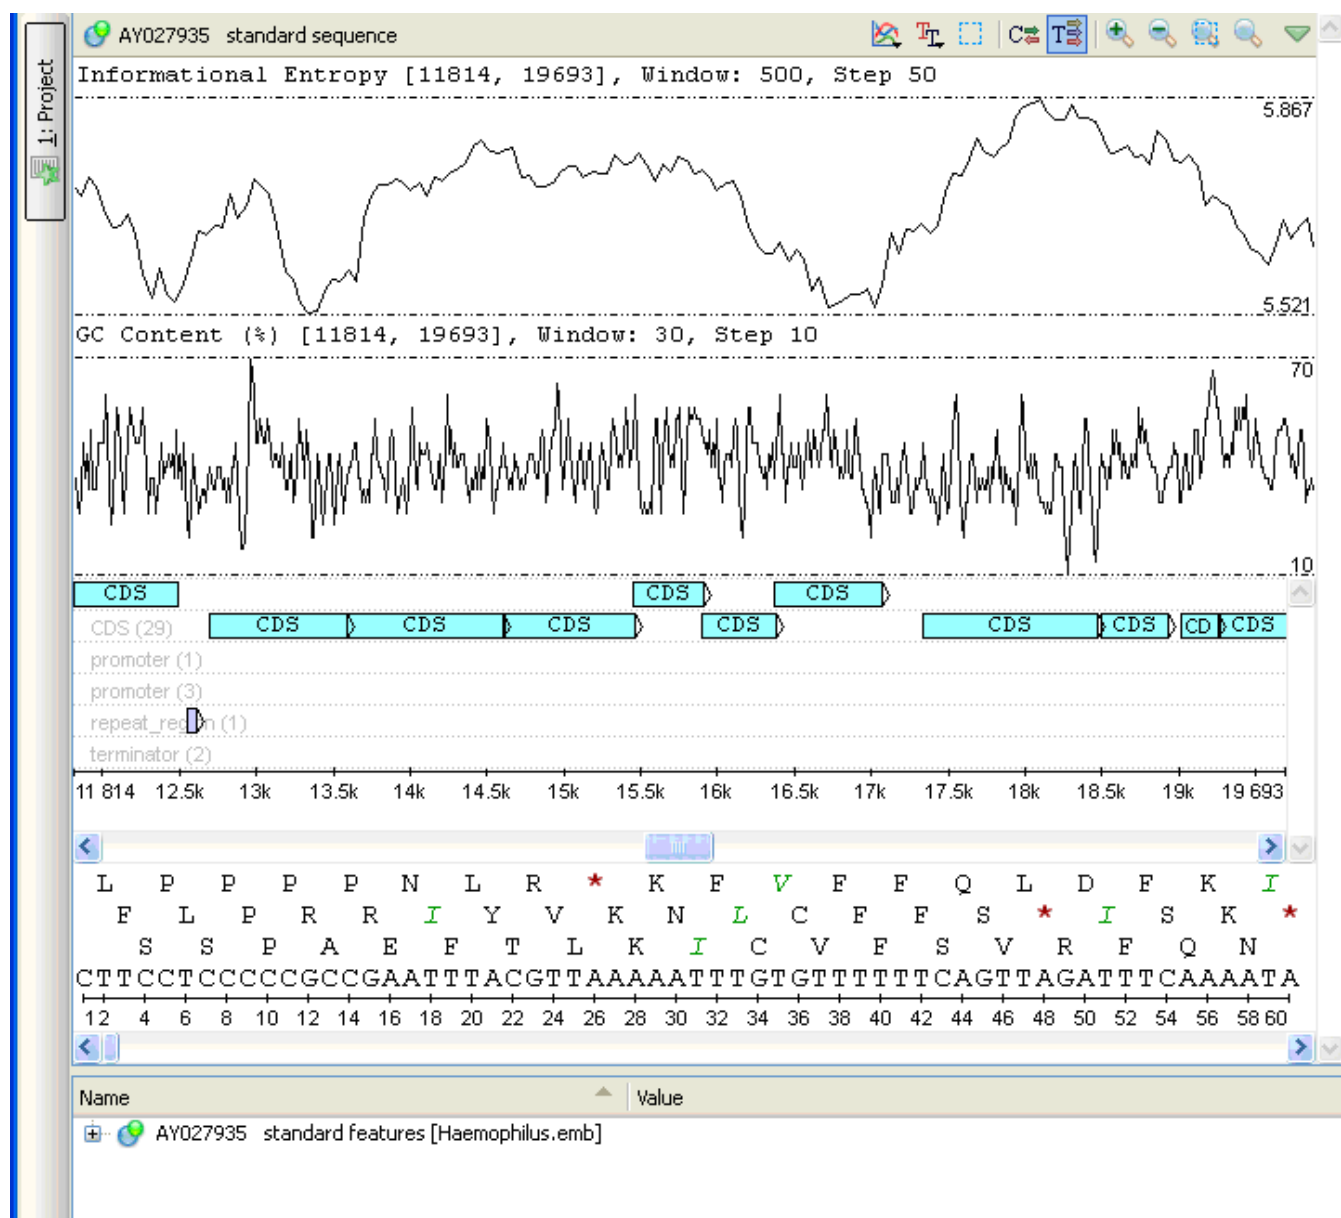

The [3D Structure Viewer](#) adds 3D visualization for PDB and MMDB files:

The [Chromatogram Viewer](#) adds support for chromatograms visualization and editing:

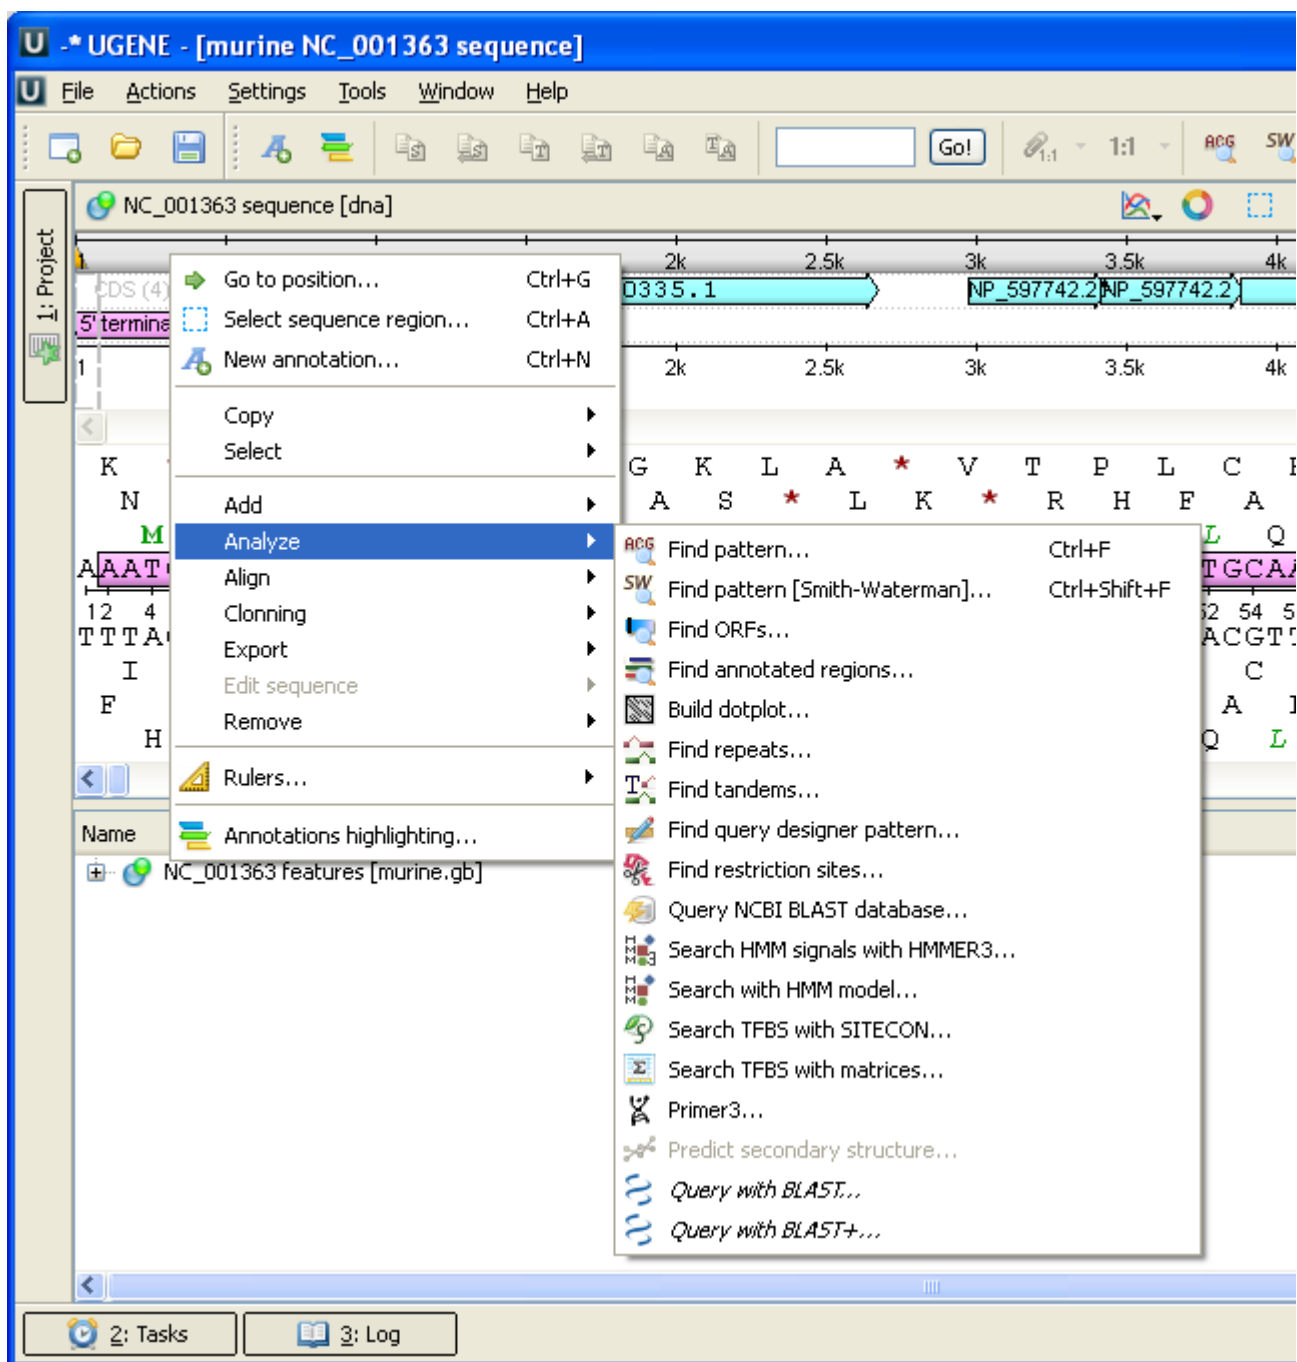

The [Dotplot](#) provides a tool to build dotplots for DNA or RNA sequences.

A number of other instruments add the graphical interface for popular sequence analysis methods:

For details see the next sections of the documentation:

- Circular Viewer
