

Statistics

To show statistics use the *Statistic* tab of the *Options Panel*:

The screenshot shows a software interface with a 'Statistics' tab selected. The panel contains several settings:

- Reference sequence:** A dropdown menu with a right arrow button and a 'Select and add' button.
- Distances column:** A section with a checked 'Show distances column' checkbox.
- Distance algorithm:** A dropdown menu currently set to 'Hamming dissimilarity'.
- Profile mode:** A group box containing three radio buttons: 'Counts' (unselected), 'Percents' (selected), and 'Exclude gaps' (unchecked).
- Automatic updating:** A checked checkbox.
- Update button:** A button labeled 'Press button to update' with a circular arrow icon.
- Hint:** A green text message at the bottom that reads 'Hint: select a reference above'.

On the right side of the panel, there is a vertical toolbar with icons for settings, data visualization, and other functions.

Here you need to select a reference sequence.

You can show/hide distance column by *Show distances column* checkbox.

Also you can change the distance algorithm, select the profile mode and exclude gaps.

To update the column use *Automatic update* checkbox or press corresponding button to update.

To generate distance matrix and grid profile see the documentation below:
