

# Opening from Clipboard

It is possible in UGENE opening text data and files by pasting them into the *Project View* from the clipboard.

Select text data in a browser or in a text editor or file(s) from your system and press *Ctrl+C* (*Cmd+C* for macOS).

Switch to UGENE with an opened project, click the project area and press *Ctrl+V* (*Cmd+V*).

The copied data or file(s) will be opened in UGENE.

Another way for the file(s) is drag-drop. Using your mouse, drag and drop the files from the file system to UGENE, and they will be opened by the program.
