

# The "comment" Annotation

General information about a file in GenBank or Vector NTI Sequence format, stored in the COMMENT sections of the file, is shown in UGENE in a special *comment* annotation in the *Annotations Editor*.

The information, for example, may include the name of the file author, creation date and last modification date for the file, and so on:

The screenshot displays the UGENE Annotations Editor interface. On the left, a tree view shows the file structure: '2xCyPET-3xFLAG-6 features [2xCyPet-3xFLAG-...' is expanded, showing 'CDS (0, 2)' and 'comment (0, 1)'. The 'comment (0, 1)' entry is further expanded, showing a list of fields: 'comment', '01', 'Author name', 'Creation date', 'Last modification date', 'Object name', and 'Owner'. The 'comment' field is selected, and its details are shown on the right. The details include the comment number '1..4340' and the text: 'This file is created by Vector NTI <http://www.invitrogen.com/>', 'Demo User', 'Thu Dec 23 13:29:41 2010', 'Thu Dec 23 13:29:41 2010', '2xCyPET-3xFLAG-6xHIS/pDONRP2R-P3 (p3\')', and 'Owner'.
