

Statistics

To show statistics use the *Statistic* tab of the *Options Panel*:

The screenshot shows the 'Statistics' tab in a software interface. It features a 'Reference sequence' section with a 'Select and add' button. Below is a 'Distances column' section with a checked 'Show distances column' checkbox, a 'Distance algorithm' dropdown set to 'Hamming dissimilarity', and a 'Profile mode' section with radio buttons for 'Counts' and 'Percents' (selected), and a checked 'Exclude gaps' checkbox. At the bottom, there is a checked 'Automatic updating' checkbox, a 'Press button to update' label, and a circular arrow icon. A green hint text at the bottom reads 'Hint: select a reference above'. A vertical toolbar on the right contains icons for settings, data, and visualization.

Here you need to select a reference sequence.

You can show/hide distance column by *Show distances column* checkbox.

Also you can change the distance algorithm, select the profile mode and exclude gaps.

To update the column use *Automatic update* checkbox or press corresponding button to update.

To generate distance matrix and grid profile see the documentation below:
