Running Workflow in Debugging Mode

By default a *workflow* runs without debugging settings. To use it go to the *Application Settings* (Settings->Preferences) and check the following checkbox and click *OK*:

General Resources Network	Workflow Designer Scene appearance		
File Format Logging Alignment Color Scheme OpenCL	Show grid Snap to grid Element style	Extended	•
Workflow Designer Genome Aligner External Tools	Element font Element background color	MS Shell Dlg 2	
	Runtime settings Track running progress Track debugger		

After that the two new buttons appears on the main toolbar:

-* UGENE - [Workflow Designer - New workflow]																
	₹c	gg	jle∖t	orea	k	poir	nt_	Sh	OWIC	orwhi	dep	orea	kpoi	nts	mana	ager
		•	0			8	ь	1	1	~	-	- 🖻	-	H
