Exporting Chromatogram Data

Open, for example, the $UGENE/data/samples/SCF/90-JRI-07.srf file. In the *Project View* context menu there is *Export chromatogram to SCF* item:

After clicking on the item, the *Export chromatogram file* dialog will appear:

Check the *Reversed* and *Complemented* options if you want to create a reverse and complement chromatogram. Press the *Export* button.

The exported file will be opened in the *Sequence View*.
