

# Show on Translation

This option is available for nucleotide sequences only. It specifies to show the annotation on the corresponding amino sequence instead of the original nucleotide sequence in the *Sequence Detailed View*, for example:

|       |  |                           |    |    |    |    |    |    |    |    |   |   |   |  |  |  |  |  |  |  |  |  |  |
|-------|--|---------------------------|----|----|----|----|----|----|----|----|---|---|---|--|--|--|--|--|--|--|--|--|--|
| ..... |  |                           |    |    |    |    |    |    |    |    |   |   |   |  |  |  |  |  |  |  |  |  |  |
|       |  |                           | D  |    | S  |    | P  |    | K  |    | L |   | K |  |  |  |  |  |  |  |  |  |  |
| 2     |  | I                         |    |    | H  |    | Q  |    | S  |    | * |   | N |  |  |  |  |  |  |  |  |  |  |
