Exporting Documents

If a document has a format that supports writing in UGENE (see the Supported File Formats chapter), you can export the document to a new document in a required format.

To do it use the *Export document* item in the context menu:

A B human Ti	L		
8 [s] hu		Open view	•
-		Add to view	•
	8	Unload selected documents	
		Lock document for editing	
		Add	•
		Import	•
		Export	•
		Edit	•
		Remove	•
	6	Export document	$\mathbf{)}$
	r)	Save selected documents	

The following dialog appears:

Export Document	<u>१</u> ×
Save to file	
File format FASTA	•
Compress file	
Add to project	
	Export Cancel Help

Here you may select the name of the output file in the Save to file field and, optionally, choose the format of the output file in the File format field. Use the C ompress file checkbox to compress the file. The Add to project checkbox, checked by default, adds the output file to the current project. After choosing all parameters click the Export button.
