# Exporting Project

All the open documents and bookmarks (along with the corresponding views states) can be saved within a project file. To do so, select *File Export Project*.
It will invoke the *Export project* dialog, where you can select the destination of the project file.

Export Project

Project file name /home/../project.uprj [...]

[Help]   [Cancel] [Export]

To load a saved project later, select *File Open* and specify the path to the project file.
