

Exporting 3D Structure Image

To export a 3D structure image select the *Export Image* item in the 3D Structure Viewer context menu or in the *Display* menu on the toolbar. The *Export Image* dialog will appear:

The image shows a software dialog box titled "Export Image". It contains several input fields and buttons. At the top, the title "Export Image" is centered. Below it, the text "Export to file" is followed by a horizontal line. Under this line, there is a "File name" label followed by a text input field and a small button with three dots. Below the file name field, there is a "Format" label followed by a dropdown menu showing "PNG". Below the format field, there are two fields: "Width" with a value of "3052px" and "Height" with a value of "1268px". At the bottom of the dialog, there are three buttons: "Help", "Cancel", and "Export".

Here you can browse for the file name, select the width and height of the image as well as its format: svg, png, ps, jpg, jpeg, tiff, tif, pdf, bmp, or ppm. For jpg, jpeg formats the quality score parameter is available.
