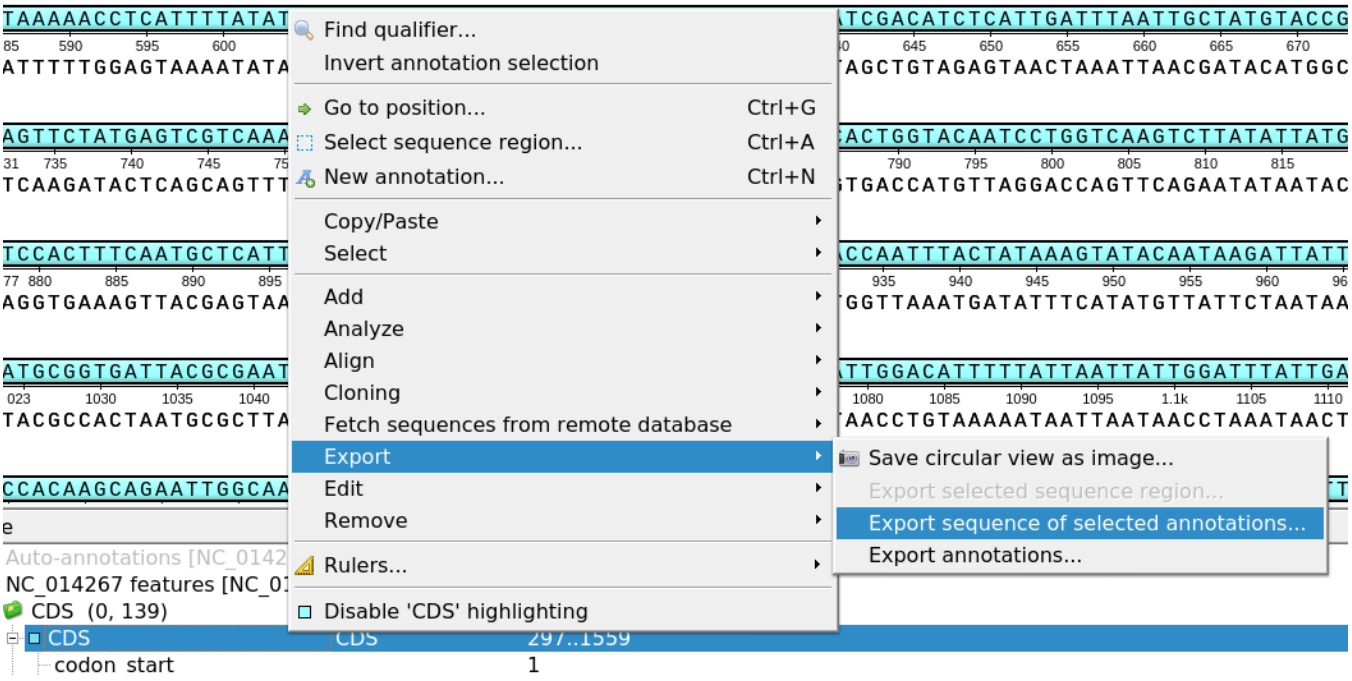
Exporting Sequence of Selected Annotations

Open the *Sequence View* with a document that contains annotations. A good candidate here could be any file in Genbank format with both sequence and annotations. Select a single or several annotations or annotation groups in the *Annotation editor*, click the right mouse button to open the context menu and select the *Export Export sequence of selected annotations* item:



The *Export Sequence of Selected Annotations* dialog will appear which is similar to the *Export Selected Sequences* dialog described *here*.
