

Phylogenetic Tree Viewer

The *Phylogenetic Tree Viewer* is intended to display a phylogenetic tree built from an alignment or loaded from a file (e.g. a Newick file).

By default, a phylogenetic tree is synchronized with the corresponding alignment.

To disable/enable synchronization use the *Tree and Alignment synchronization* button.

To load a tree from a file follow the instruction described in the [Opening Document](#) paragraph or use the *Tree settings* tab of the *Options Panel*. For example, you may open the \$UGENE\data\samples\Newick\COI.nwk sample file provided within UGENE package.

To build a tree from a multiple sequence alignment see the [Building Phylogenetic Tree](#) paragraph.

To learn what you can do with a tree using UGENE Phylogenetic Tree Viewer read the documentation below.

- [Tree Settings](#)
