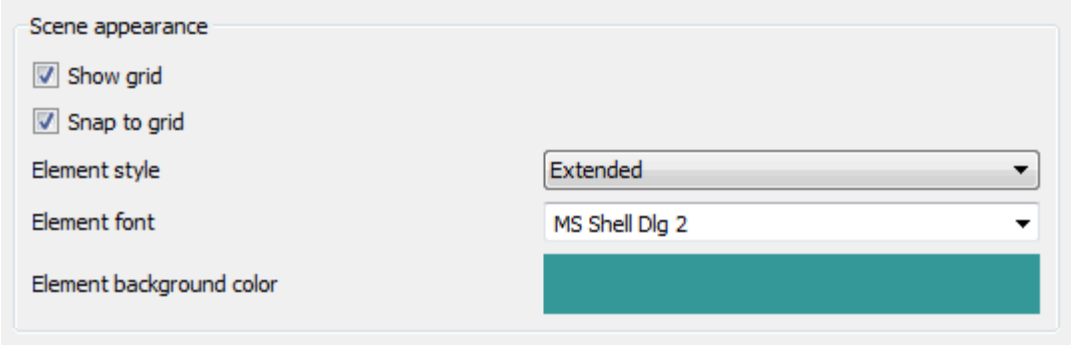
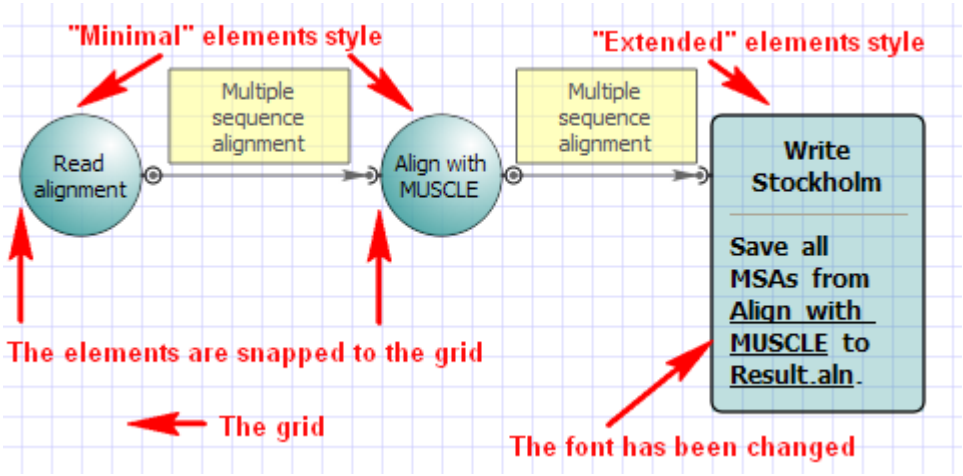
Changing Appearance

The default setting that influence the Workflow Designer appearance can be set in the *Application Settings* dialog. The parameters are shown in the image below:



The *Show grid*, *Snap to grid*, *Element style,* and *Element font* parameters affect the view of a workflow:



To change the appearance of a particular element use it's context menu submenus *Element properties* and *Element style*.

Another way to change an element style is to use the *Element style* submenu in the main menu.
