Copying and Pasting Subalignment

To copy the current selection click the *Copy/Paste Copy selection* item in the *Actions* main menu or the context menu. The hotkey for this action is Ctrl-C.

Also, you can copy the selection in different formats, for example, FASTA, CLUSTALW, RICH TEXT(HTML), NEXUS, MSF.

To copy subalignment in selected format do the following:

- Select the subalignment;
- Select the *Copy/Paste->Copy (custom format)* context menu item in the context menu or use hotkey *Ctrl+Shift+C.*
- The global Options Panel tab will open:

- Select format and press the *Copy* button.

To paste any of copied selections use the *Copy/Paste->Paste* context menu item or *Ctrl+V* shortcut.

To paste content before selection use the *Copy/Paste->Paste (before selection)* context menu item or *Ctrl+Alt+V* shortcut.

To cut the selection use the *Copy/Paste->Cut* context menu item or *Ctrl+X* shortcut.

To copy the whole row(s) use the corresponding context menu item.
