Filling Selection with Gaps

Select a region in the alignment and choose

- the *Edit Insert gaps* item in the context menu or press the Spacebar. The region is filled with gaps shifting the subalignment from the region to the right. Region selection is also moved to the right.
- the *Edit Replace with gaps* in the context menu or press the Shift+Spacebar. The region is filled with gaps shifting the subalignment from the region to the right. Region selection is not moved.
