

# Adjusting Tree nodes

Node shapes and Tip shapes are unselected by default in the *Tree settings Options Panel*.

Selection *Node shapes* option draws circles on all internal nodes.  
Selection *Tip shapes* option draws circles on all end nodes on the right.

A screenshot of the 'Tree settings Options Panel'. The panel has a light gray background and contains several sections. At the top, there is a 'Color' section with a gray color swatch. Below it is a 'Font' section with a dropdown menu showing 'MS Shell Dlg 2'. Next is a 'Size' section with a dropdown menu showing '12'. Below that is an 'Attributes' section with three buttons: 'B', 'I', and 'U'. The 'Branches' section is expanded, showing 'Expansion' and 'Curvature' sliders, a 'Color' section with a blue color swatch, and a 'Line width' dropdown menu showing '1'. The 'Nodes' section is also expanded, showing two checked checkboxes: 'Node shapes' and 'Tip shapes'.
