

# Saving Project

To save a project select the *File Save project as* menu on the main toolbar.

The dialog will appear:

The image shows a 'Save project as' dialog box. It has a title bar with the text 'Save project as'. Inside the dialog, there are two text input fields. The first is labeled 'Project name' and contains the text 'My|Project'. The second is labeled 'Save project to file' and contains the text '/UGENE\_Data/project.uprj'. To the right of the second field is a small button with three dots. At the bottom of the dialog, there are three buttons: 'Help' on the left, 'Cancel' in the center (with a red circle icon), and 'Save' on the right (with a green arrow icon).

Here you need to specify the visual name for the project and the directory and file to store it.
