

# Locked Documents

To lock the *document* that is already present in the current *project* select it in the [Project View](#) and click on the *Lock document for editing* context menu item.

The lock icon in the document element indicates that the document can't be modified:

UGENE does not allow modification of some formats that were created not by UGENE.

If UGENE is able only to read a document (see the [Supported File Formats](#) chapter), you can export the document objects to a file. To do it use the [built-in export utilities](#).

Also, you can [export](#) the document objects of unlocked documents.
